

## **FIVE LARGE ITALIAN BANKING GROUPS HAVE CHOSEN THE NEW “MARKET ABUSE” SOFTWARE DEVELOPED BY CAD IT**

***CAD IT’s solution identifies suspect operations of market manipulation in terms of  
the new Market Abuse norm.***

CAD IT, leader in the Italian software market, quoted in the STAR segment of Borsa Italiana, has announced that it has already sold the new “**Market Abuse**” software to five big Italian banking institutions and estimates that sales agreed so far will **make almost a 2% contribution to the 2006 revenues.**

Thanks to these important references, the CAD IT Group intends to continue to offer the product to other Italian Financial Institutions.

The “Market Abuse” software created by CAD IT allows **Banks, SIM and SGR** to identify any suspect operations of market manipulation and any eventual abusive operations regarding inside information (Insider Trading) in accordance with the **instructions in the Consob and CESR (Committee of European Securities Regulators) norm.**

“Market Abuse” software is interfaced with **Area Finanza**, also by CAD IT, market leader in the Italian banking sector for the management of financial instrument operations, but it can also be installed in banks, SIM and SGR that do not use CAD IT software.

Those banking groups that have chosen “Market Abuse” will not only be using the procedure for their retail banks but also for their brokers and the group’s SGR, which just goes to show the product’s flexibility both in technological terms and in its adaptation to the various types of transaction on national and foreign markets.

“Market Abuse” software, like all of CAD IT’s procedures, is **multi-platform, multi-branch and multi-lingual** so as to guarantee CAD IT clients the maximum flexibility of choice.
